PROJECTS

I strive to make meaningful, live, deployable projects that follow industry build standards. I aspire to write code and contribute to projects that others can learn from.

In 2016 I built my first weather API app using Ruby on Rails. I started making my first HTML websites in 2004.

Aora / In Progress - Full Stack Video Sharing App
Tech: React Native, Native Wind, Appwrite
Repository: https://github.com/joeoverflowcode/aora

Promptopia / April 2024 - Full Stack create/read/update/destroy App
Tech: Next.js, Tailwind CSS, Google OAuth, Mongoose, MongoDB, Vercel
Live:https://deploy-vercel-promptopia.vercel.app/
Repository:https://github.com/joeoverflowcode/deploy_vercel_promptopia

Texas Coding Club / March 2024 - Front-End Deployed Blog

Repository: https://github.com/XINEXPORT/vite-ghpages

Bio Behavioral Institute / February 2024 - Front-End MVP Landing
Tech: React, Tailwind, Canva, DreamHost
Live: www.porterprotokeg.com
Repository: https://github.com/joeoverflowcode/bio_behavioral_institute

SKILLS

Most of my recent experience is around the React library and related frameworks. My short term goal is to use Typescript in a project.

Languages: Javascript, Java, Python, HTML, CSS, SQL
Frameworks/Libraries: React, Next.js, React Native, Express, Bootstrap
Database: MongoDB, Appwrite, PostgreSQL
Software: Git, Github, Excel, Microsoft Office, Ximple, Bloomberg Terminal, Slack
Deployment: Github Pages, DreamHost, Vercel

Education

I consider myself to be a life-long learner - someone who continues to learn new skills and competencies even after completing formal education.
